# **BIOGRAPHY**

I started in the pest control industry in 1998 with Bug Out Service in Jacksonville, Florida. I helped grow the Lawn & Ornamental Department, and as BugOut quickly grew in size it was acquired by Environmental Pest Service (EPS). Now, years later, EPS is part of the Rentokil North America (RNA) family. It's been a long and exciting journey and I now have the privilege of working for the largest pest control company in the country. I wouldn't change anything!

I chose this field because I wanted to start a new and sustainable career. The pest control industry has provided me with the tools, knowledge and skill set to continually grow. It has become a true passion and I plan on remaining in the industry until I retire.

I am the L&O National Subject Matter Expert for RNA. I evaluate retention rates, product usage, provide field training and consultation on a variety of topics. My career with EPS helped launch me into my role with RNA.

Prior to starting with RNA I also managed the entire Lawn Division for Florida with EPS. These regions extended from Jacksonville to Naples. Prior to accepting larger roles, I remember my years with BugOut. Combined, I spent more than 18 years as a Technician, Service Manager, Branch Manager and Technical Director. Those years were spent sharpening my skill-set and developing technicians.

I am currently a Florida-certified operator in L&O, GHP, and Termite. I also hold my L&O license in Georgia and recently passed the A.C.E exam. During my career, I have been a part of several board and training platforms in the industry. I was part of the Bayer advisory board for 3 years (2013-2015). I have also been on the board for Pest Management University in Apopka since 2014 and I currently assist Dr. Faith Oi and Paul Mitola in the development and training for the L&O classes at Pest Management University (PMU). My future goals are to eventually take on a President's role with the PMA and assemble a team of RNA L&O experts to oversee the program nationwide.

I have been a member of the FPMA for 21 years. In 2015 I became Assistant Director for FPMA for Region 5 and in 2016, Region 5 Director. I have helped organize and host four FPMA clay shoots. I was on the Summer Conference Committee in 2016, I have been on the Political Action Committee (PAC) since 2017. I currently hold the position of Treasurer on the Executive Committee of FPMA.

I hope to continue my journey in this industry and continue to be a part of the FPMA family.
