This report does not cover areas such as, but not limited to, those that are enclosed or inaccessible, areas concealed by wall-coverings, floor coverings, furniture, equipment, stored articles, insulation or any portion of the structure in which inspection would necessitate removing or defacing any part of the structure. This property was not inspected for any fungi other than wood-decaying fungi, and no opinion on health related effects or indoor air quality is provided or rendered by this report. Individuals licensed to perform pest control are not required, authorized or licensed to inspect or render such opinions.

A wood-destroying organism (WDO) means an arthropod or plant life which damages and can reinfest seasoned wood in a structure, namely, termites, powder post beetles, old house borers, and wood-decaying fungi.

This report is made on the basis of what was visible and readily accessible at the time of inspection and does not constitute a guarantee of the absence of wood-destroying organisms (WDOs) or damage or other evidence unless this report specifically states herein the extent of such guarantee.

Note: This is NOT a structural damage report. It should be understood that there may be damage, including possible hidden damage present.

FURTHER INVESTIGATION BY QUALIFIED EXPERTS OF THE BUILDING TRADE SHOULD BE MADE TO DETERMINE THE STRUCTURAL SOUNDNESS OF THE PROPERTY.

Based on a visual inspection of accessible areas, the following findings were observed:
